Total Print management solution

# Printing environment that works for you

SMARTER PRINTING, CONNECTING YOUR BUSINESS ALL THE TIME

## Print Smart is the Solution

You have business to attend to; it does not include managing printing devices. Global one has a solution: Printsmart. Let our Printsmart consultants focus on:

- Tracking the number of printers, copiers, and fax machines you have
- Evaluating whether they are being used properly, too much or too little
- Making educated decisions on procuring and replacing printing assets
- Gathering meter readings
- Reducing your printer downtime with preventative maintenance and proactive supplies
- Determining the actual costs associated with each machine

## DOES THIS SOUND FAMILIAR

- Printing devices are everywhere, and their management is haphazard
- Your IT department does not have time to waste on print problems
- Printers break down during important jobs
- You contact multiple vendors for service and supplies
- It is difficult to determine the actual costs of printing, or create a plan to control those costs
- You just want the ability to print

# flexible Print solutions for Your business needs

## DATA FROM YOUR PRINT FLEET

Print Manager Plus gathers extensive information from your printing devices, including:

- Page counts
- Toner levels
- Device description
- Serial number
- Maintenance kit levels
- Asset number
- Location.
- Device location mapping
- Cost per page tracking
- Device status
- Utilization
- LCD reading
- Trending reports

## INTELLIGENT AND SECURE

The download and installation of the Print smart data collection agent (DCA) is quick and easy. Once installed, the DCA runs as a windows service in the background, operating 24 hours a day, 7 days a week, with minimal bandwidth requirements.

After each discovery, the collected data will be sent using one way communication to the Printsmart secure web server. This allows us to continuously monitor your printing environment remotely, without disrupting your day to day business. No personnel or user data is collected. The collected data is sent via port 443, port 80 or port to the webserver

## AUTOMATED SUPPLIES

Printsmart allows you to reduce stock levels. Within Printsmart, you can set up customizable alert settings, so when a toner gets low, an automated email is sent to us, telling us the location and the type of toner required- You can now use that storage area for something else.

## CUSTOM REPORTS

Create preformatted and custom reports. Customizable executive reports bundle related reports into a single document. Reports can be set to automatically email to a recipient on a predetermined basis, or can be downloaded in pdf format from the Print smart Optimizer web interface .

## DEVICE LOCATION MAPS

Place devices on blueprint images of an office location. Use this as a consulting tool to reallocate, consolidate, replace, or retire devices, or to simply quickly locate a particular device .

## HOW CAN YOU BENEFIT

Our Managed Print Services Program gives you control over your laser printing costs. For one low cost per page we will provide all of the supplies and service for your printer fleet. Regardless of the make of the printer, with our method of printer services, you will reduce downtime for your network devices. You'll also ensure that your employees will have the right printing device available at the right time, receive proactive printer failure notices, and receive detailed reports on all devices and users – all while reducing your overall costs.
